State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Normal Operations	Normal Operations	Normal Operations

Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **CDPH Statewide Travel Advisory**

As of 06/15/21, CDPH and the CDC recommend delaying travel until persons are fully vaccinated. For more information: [CDC Travel Guidelines](#)

- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details

SITUATION SUMMARY

2021 July Extreme Heat Event

- On 07/08/21, Phase II of the Heat Contingency Plan was activated due to forecasts of dangerous and excessive heat.
- A 1000 hour Statewide Conference Call has been coordinated starting 07/07/21 through 07/09/21 with plans to continue the calls into the weekend as the situation warrants.
 - The Conference Call is in response for potential impacts due to the heat, and weather models predicting possible higher temperatures than the Late June 2021 Heat Event.
- On 07/07/21 the Sit Cell activated to Enhanced Watch for Incident Reporting for the July 2021 Heat Event.

2021 July Electrical Transmission Emergency

On 07/09/21, the California Independent System Operator (CAISO) declared a Stage 2 System Emergency Notice and issued a Flex Alert due to extreme heat and wildfires.

- CAISO extended the statewide Flex Alert a second day to avoid a possible shortage of energy as extreme heat in California and a growing wildfire in Southern Oregon threatening transmission lines continue to strain the state's electric grid.
- A Flex Alert is a call for consumers to voluntarily conserve electricity when there is a predicted shortage of energy supply, especially if the grid operator needs to dip into reserves to cover demand. When consumers reduce electricity use at critical times, it can prevent more dire emergency measures, including possible power outages. Go to flexalert.org for more information.
- All three utilities (PG&E, SCE, and SDG&E) activated their EOCs and were assigned a Cal OES Representative for the Stage 2 Emergency.
- A Restricted Maintenance Operations has been declared for Monday 07/12/21, 1600 hours through 2100 hours. [CAISO also issued a Flex Alert for the same period](#). CAISO is anticipating high loads and temperatures across the CAISO Grid.
- Restricted Maintenance Operations requires generators and transmission operators to postpone any planned outages for routine equipment maintenance, ensuring all grid assets are available for use.

WEATHER KEY POINTS

07/11/21 - 07/17/21

Sunday-Saturday

- Hot temperatures continue for much of interior and southern California, with **high to very high heat risk** impacts through Monday
 - High temperatures across much of the Central Valley and interior southern California will range from upper 90s to around 115 through Monday, with areas into the 120s in the southern deserts and near 130F at Death Valley.
 - Excessively warm overnight temperatures are also expected through Monday. **Overnight low temperatures will range from 15-25 degrees above normal for early-to-mid July.**
 - **Many locations will approach or break daily records throughout the event, both for daytime high temperatures and high overnight low temperatures.**
 - **Compared to recent significant heat waves this year, the high temperatures will be slightly warmer than recent events, and the overnight lows will be several degrees warmer than previous events.**
 - Slightly cooler but still above normal temperatures expected for the middle of this week.
- Breezy conditions each afternoon will persist in the foothills and mountains, bringing periods of elevated fire weather conditions
- Isolated thunderstorms are possible across southern California mountains and across the Sierra, with the best chance Monday and Tuesday. Precipitation amounts are not expected to be significant, with lightning and erratic gusty winds the main threat.
 - Northern, coastal and most southern California locations will remain dry throughout the week
